

Scope of Work

Contractor:

Dr. Craig Van Kirk

Petroleum Engineer

10463 E. Chinook Trail

Parker, CO 80138

Purpose:

To assist the State of Wyoming in its investigation of ground water issues in the area east of Pavillion in a way that enables the state to identify the causes of water quality problems in near surface drinking water wells and draw conclusions and/or identify next steps (if needed) for the investigation.

Scope of Work:

1. Review and comment on the technical data and analysis done to-date by the well bore integrity team.
2. Review the draft EPA reports and the upcoming USGS sampling results and provide an assessment of the theories and conclusions that have been drawn.
3. Provide views on whether the scope of the studies and sampling efforts to-date is adequate, and if in need of expansion or contraction, recommend how to proceed.
4. Provide general comment and advice to the state as appropriate during the course of the review.
